

Anti-Glare LCD TV Protective Filter

Recommended for Wii popular game

- **Patented technology Anti-reflective optical filter**

Special near-nano-scale optical ant-reflective treatment is applied on the lens surface, completely eliminating reflected light from ambient light sources.

- **Unique anti-glare function protects your eyes**

Unique next-generation anti-glare technology eliminates dazzling glare, thereby preventing dry eyes, tears, and nearsightedness.

- **Effectively reduce UV light and electromagnetic radiation (VHF/UHF), ensuring safer use**

Blocks harmful UV light and low-frequency electromagnetic radiation, preventing possible skin, eye, and immunization system diseases resulting from extended periods of exposure to UV light.

- **Product meets RoHS standard by using environmental protection, non-pollution PMMA material.**

Use only pure, optical-class PMMA, which completely meets the heavy metal content standards of EU's RoHS.

- **Utilizes highly impact-resistant materials, providing total protection for LCD TVs**

Has a high safety physico-factor, providing total protection for LCD TV area as often scrape, stains and impact...artificial damage.
